We offer

Share Button Ads: a new revenue stream for Site Owners and a new marketing tool for Brands

The right timing to deliver a promo, is after sharing, which is not affecting user experience.

Lock visitors attention

We won banner blindness. The eye-catching ad is right there, no way to miss it.

Get more traffic

We bring audience growth via AI.

How it works

Step 1

Visitor is sharing...

Step 2

...returns to the website...

Step 3

...interacts with the ad.

Monetize every share, at no cost or contract, through online advertising.

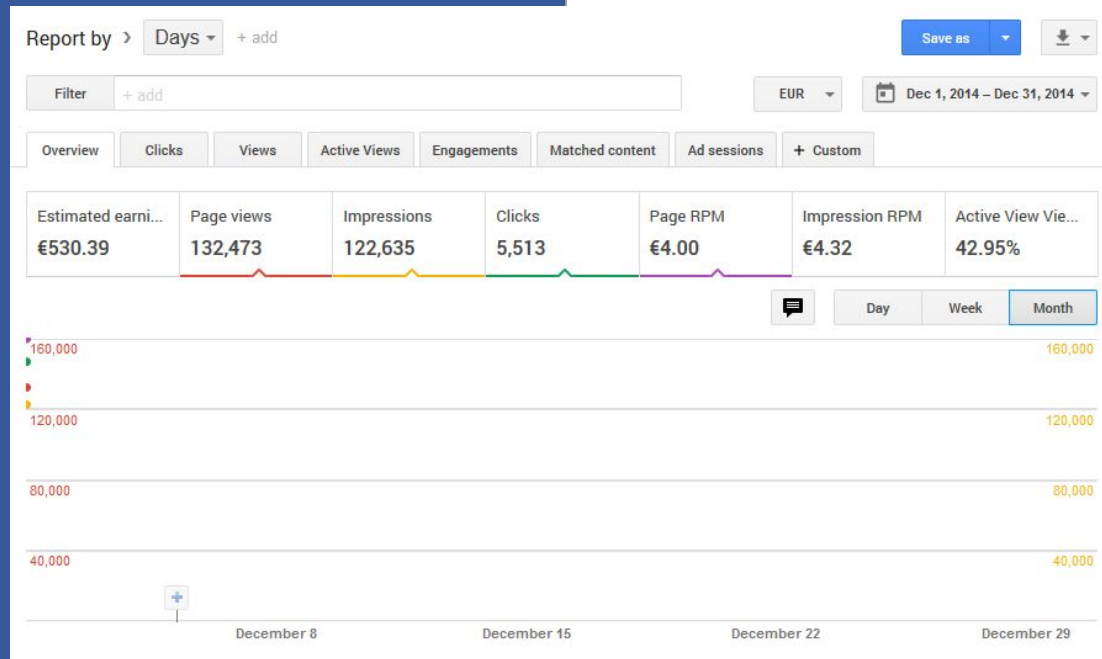

The image illustrates the E-MAILIT monetization process through four sequential mobile device screenshots:

- Step 1:** A news article on the 'tklan HD' website. The headline reads "Çfarë po fshih Zuckerberg? Facet fshin fshehurazi di mesazhe private". A green arrow points to the right, indicating the user's action of sharing the content.
- Step 2:** A social media sharing interface showing various sharing options like Facebook, Twitter, and Email. A green arrow points to the right, indicating the user's selection of a sharing method.
- Step 3:** A "Send Separately" screen displaying a list of contacts. A green arrow points to the right, indicating the user's selection of a contact to share with.
- Step 4:** A "Booking.com" advertisement for hotels, showing options like "Pilos" and "Pylos". A green arrow points to the right, indicating the user's interaction with the advertisement.
